

18-874: Spacecraft Design-Build-Fly Lab

Spring 2026

Course Description

Spacecraft design is a truly interdisciplinary subject that draws from every branch of engineering. This capstone design class brings together the material from prior classes in a way that emphasizes the interactions between disciplines and demonstrates how some of the more theoretical topics are synthesized in the practical design of a spacecraft. The class will design, build, and test a small satellite that addresses objectives and requirements posed at the beginning of the course sequence. Students will work in subsystem teams, each focusing on some aspect of the spacecraft, but exposed to many different disciplines and challenges. Practical, hands-on engineering skills will be emphasized, along with fabrication and testing of physical hardware and the creation of thorough documentation.

Special note for Spring 2026:

This offering of the course is different from all prior offerings of the course in that it is being offered for a single semester, not for the typical two-semester design-build-fly cycle. In this case, the teams in the course will be taking custody of engineering tasks leading up to the launch of two Argus-2 satellites, with a launch date of June 2026, Integration date of April 17 2026, and Testing deadline of April 1 2026. In parallel with launch readiness for Argus-2, the team will be developing and implementing features for Argus-3, which will launch approximately 12-18 months in the future.

Instructors

Prof. Brandon Lucia

Learning Objectives

The goal of this course is to give students hands-on experience designing and building small spacecraft subsystems and integrating them into a CubeSat. Throughout this course, students will:

1. Understand how the design and integration of a system whose performance depends on the success of many interacting subsystems.
2. Work within a small team to fabricate, and test hardware and software through rapid design iteration.
3. Coordinate with other teams to integrate subsystems into a complete spacecraft.
4. Gain exposure to the complete life cycle of a small satellite mission.

5. Develop skills at project management and systems engineering
6. Develop social skills and planning skills to work with a large group and coordinate many required tasks to launch-ready a satellite.

Logistics

The course will involve designing and building hardware in small teams. Class time will be used primarily for weekly team meetings and consulting time to meet with the instructors.

- All-hands meetings will be held at 9:30 on Wednesdays, followed by consulting hours.
- Mandatory lab working sessions will be held on 9:30 on Mondays.
- Sub team meetings will be held once per week at times coordinated with the instructors.
- Attendance of weekly team meetings is mandatory.
- Slack will be used for coordination between teams and instructors. All students will be added to the “SpacecraftDesignBuildFlyLab” slack channel.
- GitHub will be used to manage project files for all teams and teams will be required to use good git hygiene and software engineering practices.

Assignments and Exams

There will be no exams in this course. Evaluation will be based on participation, contribution to design and fabrication work, final documentation, and weekly project management metrics from each team.

Grading

Grading will be based on:

- 25% Participation and attendance of team meetings
- 25% Individual technical contributions quantified by git commit history / number and significance of PRs and peer surveys
- 25% Completeness and quality of team documentation

Learning Resources

There is no textbook required for this course.

Course Policies

Attendance: This is a team-based course. In order to coordinate work among teams, participation in weekly meetings is required. If you are unable to be present at a meeting, you must notify the instructors and ensure that your teammates are prepared to present your work.

Accommodations for Students with Disabilities: If you have a disability and are registered with the Office of Disability Resources, I encourage you to use their online system to notify me of your accommodations and discuss your needs with me as early in the semester as possible. I will work with you to ensure that accommodations are provided as appropriate. If you suspect that you may have a disability and would benefit from accommodations but are not yet registered with the Office of Disability Resources, I encourage you to contact them at access@andrew.cmu.edu.

Statement of Support for Students' Health & Well-Being: Take care of yourself. Do your best to maintain a healthy lifestyle this semester by eating well, exercising, avoiding drugs and alcohol, getting enough sleep, and taking some time to relax. This will help you achieve your goals and cope with stress.

If you or anyone you know experiences any academic stress, difficult life events, or feelings like anxiety or depression, we strongly encourage you to seek support. Counseling and Psychological Services (CaPS) is here to help: call 412-268-2922 and visit <http://www.cmu.edu/counseling>. Consider reaching out to a friend, faculty, or family member you trust for help getting connected to the support that can help.

If you or someone you know is feeling suicidal or in danger of self-harm, call someone immediately, day or night:

CaPS: 412-268-2922

Off campus: 911

Tentative Spring 2026 Schedule

Week	Dates	Topics
1	Jan 12 Jan 14	Course Overview & Logistics Mission PDR Review and Team Assignments
2	Jan 19 Jan 21	No Class (MLK Day) Argus-3 Objectives
3	Jan 26 Jan 28	Project Management All-Hands Meeting
4	Feb 2 Feb 4	Lecture Orbital Edge Computing (In Lab) All-Hands Meeting
5	Feb 9 Feb 11	Lab Day (Prof. Lucia Out) Lab Day (Prof. Lucia Out)
6	Feb 16 Feb 18	Lecture Efficient's Dataflow Architecture All-Hands Meeting
7	Feb 23 Feb 25	Lecture Embedded Rust All-Hands Meeting
8	Mar 2 Mar 4	No Class (Spring Break) No Class (Spring Break)
9	Mar 9 Mar 11	Case Study (short lecture): Tartan Artibeus All-Hands Meeting
10	Mar 16 Mar 18	Guest Lecture or Lab Day All-Hands Meeting
11	Mar 23 Mar 25	Lab Work Day No Class (ASPLOS)
12	Mar 30 Apr 1	Guest Lecture or Lab Day All-Hands Meeting
13	Apr 6 Apr 8	Guest Lecture or Lab Day All-Hands Meeting
14	Apr 14 Apr 16	Lab Work Day All-Hands Meeting
14	Apr 21 Apr 24	Final Presentations / Design Review Final Presentations / Design Review
